## 3. About Aknia

Aknia is an Indonesia-based, globally oriented investment manager that leverages quantitatively grounded framework with corporate culture insights to identify, invest in, and evolve with the highest-quality founders and digital assets worldwide.

---

## 4. Fund Structure

The Fund is an unregistered managed-investment scheme. Units confer a beneficial interest in the trust's assets but are not listed on any securities exchange. The Fund may establish feeder entities or segregated sub-trusts to improve operational efficiency, custody or staking arrangements.

---

## 5. Investment Objective

To generate long-term capital growth and income by systematically investing in blockchain protocols and tokens with asymmetric upside potential, robust network effects and clear token-economic moats. While this reflects Aknia's best endeavors, returns are not guaranteed.

---

## 6. Investment Strategy

### 1. Data-Driven Selection

- We merge proprietary on-chain signals with traditional valuation overlays to pinpoint digital assets exhibiting strong fundamentals and accelerating adoption.
- Our quantitative models analyze transaction flows and network activity to uncover emerging trends ahead of market consensus.

### 2. Adaptive Staking & Yield

- By optimizing allocations across staking, liquidity pools and yield-earning protocols, we enhance income potential without sacrificing safety.
- Rigorous smart-contract audits and continuous risk monitoring guard against protocol vulnerabilities.

### 3. Dynamic Risk Management

- Active position sizing and defined drawdown limits preserve capital in volatile market conditions.
- Regular stress-testing and scenario analysis ensure exposures remain within defined thresholds.

### 4. Regulatory Vigilance

- Our legal and compliance experts track policy developments in real time, adapting the investment mandate as frameworks evolve.
- This proactive approach shields allocations from sudden regulatory shocks and positions the Fund to capitalize on favorable rulings.

Risk limits include: no single asset (other than BTC or cash) to exceed 40 % of NAV at acquisition; allocation to special opportunities capped at 20 %. Cold storage, institutional-grade custodians and multi-sig wallets mitigate cyber-risk. Derivatives may be used for hedging, not leverage; the Fund will not borrow fiat but may borrow assets for short selling as a risk-management overlay.

Portfolio re-balancing is driven by Aknia's proprietary scoring system that blends on-chain metrics with macro-cycle indicators.

## 7. Fund Performance

Past performance is not a reliable indicator of future performance.

Period	Chain Catalyst Fund (p.a.)	Spot BTC	Value Add (p.a.)
1 Year	173.6 %	58.1 %	115.5 %
2 Year (p.a.)	124.4 %	92.9 %	31.5 %
3 Year (p.a.)	117.4 %	74.9 %	42.5 %

Ticker	Name	% of Portfolio
BTC	Bitcoin	42.0%
HYPE	Hyperliquid	17.5%
ETH	Ethereum	4.0%
SOL	Solana	2.1%

## 9. Risks

Key risks include:

- **Market Risk:** Digital-asset prices may be highly volatile.
- **Smart-Contract Risk:** Code vulnerabilities or exploits can lead to losses.
- **Regulatory Risk:** Changes in law or enforcement can adversely affect token values.
- **Liquidity Risk:** Some tokens may be illiquid, leading to wide bid-ask spreads.
- **Operational Risk:** Custody, exchange-hack or protocol-failure exposures.
- **Performance Fee Risk:** Incentives tied to outperformance may encourage higher-risk allocations.

---

## 10. Fees and Other Costs

Fee Type	Amount
Management Fee	2% of NAV
Performance Fee	20% of returns above Spot BTC
Buy/Sell Spread	Not applicable (closed private fund)
Transaction Costs	Estimated 0.05% of NAV per annum

*All fees are deducted from the Fund's assets. Performance fees are calculated and crystallised semi-annually.*
